

engine Protein Arrays

E. coli clones spotted onto PVDF membrane (22 x 22 cm / approx. 8.7 x 8.7 inch) express recombinant human proteins with N-terminal RGS-His₆ tag.

	hEXselect engine Protein Array	UniPEX engine Protein Array
Product No.	1003	1008
Source	Human fetal brain cDNA	Human fetal brain, T-cells, lung and colon cDNA
Array Content	>57,000 spots in total, >21,000 distinct human antigens, >7,000 different genes	>36,000 spots in total, >15,000 distinct human antigens, >6,000 different genes
